MEMORANDUM FOR: Project Contracting Officer

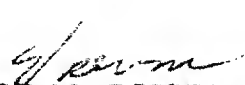

12 March 1956

SUBJECT : Summary Report - Photographic Test Flight Program

1. I am returning herewith a document now considerably out of date which gives reports on photographic flight testing through 10 December 1955. I assume that as such reports are received, copies are made available to the appropriate officers in Operations as well as to the other members of your own staff. I would like to make it clear that the primary responsibility within the Project Headquarters for the study and evaluation of such reports rests upon your staff with a secondary responsibility upon the Project Director of Operations and his staff.

2. Although the Deputy Project Director and I should receive copies of reports, as in the past, we will not always have the time to examine them carefully ourselves. Accordingly, I would appreciate if any salient points brought to our attention could be summarized for us in writing by your staff. We would also welcome any such comments by the Director of Operations.

3. In the event that only a single copy of a report is received, it should be studied in your office before being passed to me.

RICHARD M. BISSELL, JR.
Project Director
